EDUCATION

MASAI SCHOOL, BENGALURU

Apr 22 - Oct 23

Full Stack Development Certification

PSIT, KANPUR Jun 13 - Ju 17

Mechanical Engineering

SKILLS

- Frontend: React.js, Redux, Angular, JavaScript, HTML5, CSS3
- Backend: .NET MVC, Entity Framework, Node.js, RESTful APIs
- Database & Reporting: SQL Server (SSMS), EPPlus
- Version Control & Collaboration: Git, Agile/Scrum

CERTIFICATIONS

- [JavaScript Basics Certificate](#)
- [Prompt Engineering](#)
- [Full Stack Web Development \(MERN\)](#)

PROFILE

Software Developer with 1.7+ years of experience building scalable web applications. Proficient in React.js, Angular, JavaScript, .NET MVC, and Entity Framework, with hands-on experience in CRM solutions and RESTful API integrations. Skilled in SQL Server (SSMS) and generating automated reports with EPPlus, improving data accuracy and efficiency. Experienced in Agile/Scrum teams, optimizing frontend performance and backend query efficiency. Actively applying Generative AI and modern frameworks to enhance full-stack development and accelerate feature delivery.

WORK EXPERIENCE

➡ BN Technology(Client Ceasefire Industry), Ghaziabad Software Engineer Jun 2025 - Present

- Architected a Price List module within the CRM system for UK clients using AngularJS and .NET MVC.
- Automated price updates in the Price List module, reducing manual errors by 15% across 200+ products.
- Implemented CRM software for Indian clients (Express India project) using Angular, NgRx, and RxJS.
- Handled 500+ daily customer product queries, cutting response time by 40%.
- Engineered a room analysis module for installation assessment.
- Created a master table capturing 500+ observations and 50+ risks, improving assessment accuracy by 30% and enhancing project planning efficiency.
- Contributed to the CCRM Direct Project using Angular and .NET.
- Enhanced internal CRM performance to handle 1,000+ client records with 30% faster response time.

➡ BlackRock IT Solutions, Hyderabad Frontend Developer(React Js) Sep 2024 - Feb 2025

- Automated 60% of the timesheet submission process by architecting and implementing a user-friendly Time-off Tracking module, which led to a 92% adoption rate across the organization within one month.
- Maintained 5+ client-facing applications using React.js, Redux, and Context API, improving UI responsiveness by 30%.
- Refactored three core UI components within the Saciahub project, resolving five critical bugs related to rendering issues within a two-week sprint, dramatically improving user experience and stability.
- Contributed to Agile development cycles, accelerating feature delivery and enhancing client satisfaction.

➡ ByteXL, Hyderabad Full Stack Developer cum Tech Educator (MERN) Dec 2023 - Sep 2024

- Constructed and implemented a certification generation platform using the MERN stack, streamlining certificate issuance for 2,000+ students.
- Managed and optimized a Learning Management System (LMS) to improve student engagement and operational efficiency.
- Conducted hands-on training sessions on React.js, Node.js, MongoDB, and Azure, mentoring 100+ students in building real-world applications.
- Worked within an Agile environment using Git and REST APIs to implement new features and optimize application performance.
